

ABSTRACT OF DISCLOSURE

The present invention relates to a highly stable, readily handleable preparation for use in animal feeds. The preparation comprises sorbic acid,
5 at least one other liquid acid and one other solid organic acid and if appropriate a carrier. The active compound content (as acid) is always greater than 80% by weight. In addition, the invention relates to the use of the preparation alone in feeds or in mixture with other feed additives to improve the hygienic status of the feed and for growth promotion in farm animal
10 husbandry.
